Microsoft IT Academy Certification Roadmap

Microsoft IT Academy (ITA) Program provides students with the technology skills they need to be successful in their education and careers. With Microsoft Certification, students can validate their skills that will be beneficial in a variety of career paths including engineering, business, and technology. ITA members receive price reductions on Microsoft Certification exams so they can enable skills validation through certification for their students globally.

Microsoft Certified Solutions Associate (MCSA)
Microsoft Certified Solutions Associate (MCSA) is recommended for professionals or students in a 4-year academic program. An MCSA certification is required in order to become an MCSE.

Microsoft Certified Solutions Developer (MCSD)
MCSD certification is recommended for professionals or students in a 4-year academic program. Earning MCSD certification demonstrates your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud. Earning MCSD certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Solutions Specialist Exam (MSSC)
One of the benefits of Microsoft IT Academy (ITA) Program is the ability to earn credit toward the Microsoft Certified Solutions Specialist (MSSC) certification exam. Earning an MSSC certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Technology Associate (MTA)
MTA certification validates understanding of basic technology concepts in software development and infrastructure. Earning an MTA certification provides students and educators with the opportunity to advance to more advanced certifications.

Microsoft Certified Professional (MCP)
Microsoft Certified Professional (MCP) is recommended for professionals or students in a 4-year academic program. Earning an MCP certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Application Specialist (MCAS)
MCAS certification is recommended for professionals or students in a 4-year academic program. Earning an MCAS certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Development Specialist (MCDS)
MCDS certification is recommended for professionals or students in a 4-year academic program. Earning an MCDS certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Information Security Specialist (MCISS)
MCISS certification is recommended for professionals or students in a 4-year academic program. Earning an MCISS certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Information Worker (MCIW)
MCIW certification is recommended for professionals or students in a 4-year academic program. Earning an MCIW certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified IT Professional (MCITP)
MCITP certification is recommended for professionals or students in a 4-year academic program. Earning an MCITP certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Systems Administrator (MCSA)
MCSA certification is recommended for professionals or students in a 4-year academic program. Earning an MCSA certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Systems Engineer (MCSE)
MCSE certification is recommended for professionals or students in a 4-year academic program. Earning an MCSE certification proves your ability to build innovative professional solutions across multiple technologies, both on-premises and in the cloud.

Microsoft Certified Technology Specialist (MCITP)
